Through this Roundtable, we will continue to address challenges in sustainable seafood procurement—which are difficult to resolve through individual company efforts alone—by aiming for solutions through inter-company collaboration and implementing the following initiatives.

<Initiatives>

- Implementation of human rights due diligence
- Implementation of environmental due diligence
- Implementation of traceability

In 2026, we plan to publish a guide on the implementation of human rights, environmental due diligence and transparent traceability.

The Japan Responsible Seafood Procurement Roundtable was established on October 2nd, 2025 by Seafood Legacy initiative. ([Read more](#))
